**FANGOHEATER**

The compact design as table model makes the unit suitable to be used in any kind of practice. It is possible to process Paraligno as well as Parafango Battaglia in the heater. Because of the direct heating system, the Fango heater is highly suitable for sterilising paraffin (at 135 °C). The Fango heater is glass wool isolated and is delivered including a splash cover with cold grip.

* = Sterilisation is only possible when Parafango Battaglia is used (Paraligno can’t stand these high temperatures).

---

**PARAFFIN-BATH**

The Enraf-Nonius paraffin bath operates on the “au-bain-marie” principle. The paraffin is heated directly by the heat transferred from a heat-transfer liquid. As heat-transfer liquid you can use a special thermal-oil (13 ltr). The size of the bath makes it suitable for so-called dipping treatments. It is possible to heat Paraligno, Parafango and pure paraffin in this bath.

- Quicker heating and more even heat distribution
- Practically no temperature fluctuations in the paraffin
- Mobile
- Thermostatic temperature control (30-90 °C)
- Overheating safety mechanism

---

### TECHNICAL SPECIFICATIONS

**FANGOHEATER**

- Mains voltage: 220 – 240 V, 50 – 60 Hz
- Current consumption: 1200 W
- Range of thermostat: 0 – 100° C
- Sterilization temperature: 135° C
- Safety device: automatic switch-off when overheated (160° C)
- Capacity: 15 l
- Dimensions: 37 x 37 x 41,5 cm

### STANDARD ACCESSORIES

- 1468751 Operating manual fangoheater
- 3444290 Mains cable

### OPTIONAL ACCESSORIES

- 3448112 Paraffin wax, pure form, 25 kg
- 3448164 Paraligno, 5 kg
- 3448108 Parafango Battaglia, 12 kg
- 3448137 Parafoil, 40x60 cm, 1000 sheets
- 3448136 Heat-transfer liquid for the paraffin-bath, 5 l

---

### TECHNICAL SPECIFICATIONS

**PARAFFIN-BATH 230V/50HZ**

- Temperature range: 30-90°C
- Internal dimensions: 50x30x21 cm (30 l)
- External dimensions: 58x32x50 cm
- Mains voltage: 230 V, 50/60 Hz
- Power consumption: 2000 W (1760 W for the 115 V version)

### STANDARD ACCESSORIES

- 1400005 Operating manual Paraffin bath

- **3448208** Hot/Cold packs 13x30 cm, 6 pieces
- **3448207** Hot/Cold packs 13x14 cm, 12 pieces
- **3448130** Towelling holder for 3 packs 3448208

(1) = only for Packheater Model 3448191  
(2) = only for Packheater Model M-2 and M-4  
(3) = not for Packheater Model E-2 or 3448191

---

### ENNO MOIST
Cotton pack filled with volcanic mineral grains.

### STADTHOLDER MOORPACK
Synthetic pack filled with ‘moor’.  
- Heat is released extremely slowly  
- Can be heated in a microwave

### HOT/COLDPACKS
Synthetic gel pack.

PACKHEATERS (TYPE WB)

The packheaters are used for heating and keeping warm ('hot packs').

Features

- High quality packheater
- With stainless steel insert grid (removable)
- Housing made of stainless steel with structured surface
- Top lid handle bar in red, blue, green, yellow or black
- Double isolated top lid *
- Gas spring supported top lid *
- Energy saving insulation
- Electronic temperature control with digital temperature display *
- Protected against overheating
- Temperature measurement in the water
- Silicone heating element with large surface for a fast and consistent heating process
- Power On indicator lamp
- Heating indicator lamp
- Water outlet on the front side, ball valve ½”
- Medical device class I

* = except for WB 4-30

The packheaters can be supplied with a mobile frame (optional), consisting of:

- Powder coated steel frame
- Four castors (two of which can be locked)
- Four support points for securing the bath
- Stainless steel storage shelf

TECHNICAL SPECIFICATIONS
Mains voltage: 220-240 V, 50 Hz
Current: 2 A
Work: 0.14914 kWh of 1/5 hp
Type of refrigerant: R-134A
Amount of refrigerant: 0.325L
Test pressure: high 1.62 MPa (235 psi); low 1.03 MPa (150 psi)
Normal operating temperature: -12°C tot -6°C
Dimensions (hxwxb): 84 x 41 x 69 cm
Weight: 74 kg
For many years, Infrared Radiators have been a well-known accessory in the field of thermotherapy. Infra-red thermotherapy is often used for the reduction of pain as well as for general healing of wounds. The skin absorbs the heat and passes it through to the blood stream in a natural way.

Positioning is easy because of the specially developed fast fixation device. The unit must be ordered with a stable mobile stand, with height adjustment and safety locks on the wheels.

**TECHNICAL SPECIFICATIONS IR 6**
- Radiators: 6x150 W
- Power consumption (220 VAC): 900 W (220 VAC)
- Timer adjustment: up to 30 minutes
- Dimensions: 46x73x20 cm (WxLxD)
- Weight: approx. 14.6 kg

**TECHNICAL SPECIFICATIONS IR 3**
- Radiators: 3x150 W
- Power consumption (220 VAC): 450 W (220 VAC)
- Timer adjustment: up to 30 minutes
- Dimensions: 36x73x20 cm (WxLxD)
- Weight: approx. 11.3 kg

**OPTIONAL ACCESSORIES**
- 3444639 Mobile support for IR3 and IR6 radiators
The IRS Halogen Infrared Spots form a new generation of radiators for heat treatment (infrared thermotherapy).

Two versions of the IRS are available:
- IRS (600W / 3x200W halogen)
- IRS 2 (400W / 2x200W halogen)

**Major advantages of the IRS halogen radiators**
- **Safety** - the infrared radiators IRS and IRS 2 are the only two radiators which have been tested and approved for photo-biological safety. This means that there is no danger for the eyesight.
- **Energy efficiency** - the halogen radiator IRS and IRS 2 consume 30% less power than IR-radiators, that are equipped with conventional light bulbs (while delivering the same amount of infrared energy);
- **Patient comfort** - conventional infrared radiators generate a ‘burning sensation’ on the skin because the emitted light component is very large. By combining the halogen tube with a special filter, the proportion of light in the IRS radiators is reduced which avoids such ‘burning sensations’.

IRS Halogen radiators must be connected to a (mobile) support system since the power supply is built into the stand. These (optional) stands must be ordered separately.

**MODEL IRS (600W)**

The Halogen Infrared Spot IRS combines modern design with functionality and efficiency. With a capacity of 600 Watt (3x200W) it produces the equivalent light output as a 900 Watt infrared spot equipped with conventional light bulbs.

The specially designed reflectors of the Halogen Infrared Spot IRS spread the radiation wide and evenly on the patient’s body.

In combination with the stand SST / SSU / SSV, the Halogen Infrared Spot IRS builds a functional entity that matches the current state of the art and stands out by its straight-line design.
**HALOGEN INFRARED SPOTS**

**Features**
- Powder-coated aluminium / sheet steel housing
- Housing colour: white / black
- 3 halogen lamps (200W each), emitting infrared radiation in a therapeutically effective range
- 3 reflectors, spreading the radiation wide and evenly
- Complies with the photo-biological safety standard (DIN EN 62471)
- Electronic timer with repeat-function
- Protection grid to avoid burns
- Main switch with power indicator
- Mountable to mobile stand SST / SSU / SSV (optional)
- Mountable to wall arm HWA (optional)

**MODEL IRS 2 (400W)**

The IRS 2 is an economic halogen spot and is based on the same attractive design and the same technology as the larger version IRS.

The IRS 2 has a simplified control unit and is equipped with 2 halogen lamps (200W each) and 2 reflectors.

With a capacity of just 400W the IRS 2 produces the same light output as a 600 Watt spot equipped with conventional light bulbs.

Its compact outside dimensions and its complete functionality make the Infrared spot IRS 2 a modern and practical device.

The traditional TGS Infrared radiators are used for heat treatment (infrared thermotherapy) in physiotherapy.

Two versions of the TGS are available:
- TGS 6.2 (900W / 6x150W infrared)
- TGS 3.2 (450W / 3x150W infrared)

The TGS infrared radiators must be connected to a (mobile) support system since the power supply is built into the stand. These (optional) stands must be ordered separately.

**TGS 6.2 (900 W)**

- Powder-coated aluminium / sheet steel housing
- Housing colour: white
- Handle bar colours: red, blue, green, yellow or black
- Electronic timer (treatment time max. 60 min.)
- 6 therapeutic IR-lamps (Philips Infrared PAR 38, 150W)
- Each bulb can be switched ON/OFF individually
- Protection grid to avoid burns
- Main switch with power indicator
- Mountable to mobile stand SST / SSU / SSV (optional)
- Mountable to wall arm HWA (optional)

**TGS 3.2 (450 W)**

- Powder-coated aluminium / sheet steel housing
- Housing colour: white
- Handle bar colours: red, blue, green, yellow or black
- Electronic timer (treatment time max. 60 min.)
- 3 therapeutic IR-lamps (Philips Infrared PAR 38, 150W)
- Each bulb can be switched ON/OFF individually
- Protection grid to avoid burns
- Main switch with power indicator
- Mountable to mobile stand SST / SSU / SSV (optional)
- Mountable to wall arm HWA (optional)

The following (optional) support systems (including mains cable) are available for the IR-radiators model IRS and TGS:

- Mobile stands SST / SSU / SSV
- Wall arm HWA

**Main features mobile stands**

- Powder-coated steel frame
- Frame colour white/black (other colour combinations at extra charge)
- 4 rotating castors with parking brake
- Stepless height-adjustment from 164 to 204 cm (top edge stand)
- Lifting support with gas spring
- Front height of stand base: 60 mm (SST) or 65 mm (SSU and SSV); fits under most treatment couches
- Connector for infrared spots with Ondal-coupling (such as IRS / IRS 2 / TGS 3.2 / TGS 6.2)
- Available as T-base, U-base or V-base
